

“Everyone should use MEGA LATH™!”

The University Gateway Project, a 1,600-bed dormitory at USC, incorporates some 18,000 yards of Structa Wire's Mega Lath product.

“We substituted Mega Lath for 3.4# metal lath and are glad we did. With Mega Lath, 3-coat stucco production is faster, stress cracking is greatly reduced, and end lap cracking is eliminated entirely. Everyone should use Mega Lath!”

- Gary Paoli, President
Premier Wall Constructors, Inc.

Structa Wire congratulates our customer, Premier Wall Constructors, on winning the prestigious Walter F. Pruter award for its multi-family residential project at the University of Southern California. These annual awards recognize quality craftsmanship, materials, and design in the construction industry.
